

DJIOTSA CHRISTIAN

SOFTWARE ENGINEER

EXPERIENCE

Ultrasoft Technologies SARL

Yaoundé

Software Engineer

02/2025 - Present

- Developed and optimized web and mobile applications for clients in various sectors
- Worked closely with marketing and UX teams to design user-centric solutions
- Performed rigorous testing, debugging, and performance optimization across applications
- Contributed to building scalable backend services for secure transactions, data management, and workflow automation
- Integrated third-party services and APIs to expand application functionalities and streamline workflows
- Implemented RESTful APIs to enhance communication between frontend and backend services, improving data retrieval efficiency by 30%

HNG Tech

Remote

DevOps Engineer

01/2025 - Present

- Implemented continuous integration and continuous deployment (CI/CD) pipelines to streamline development workflows
- Managed cloud infrastructure and automated deployment processes to ensure scalability and reliability

Zepstra LTD

Buea

Employee Goal Tracker (EGT) Developer

06/2023 - 01/2024

- A system for managing employee goals, tasks, and performance evaluation
- Developed web and mobile functionalities
- Performed testing and code optimization
- Provided actionable insights for performance tracking

Faculty of Engineering and Technology , University of Buea

Buea

Named Entity Recognition Developer

03/2024 - 08/2024

- An AI-powered system for identifying entities in the Yemba language
- Contributed to developing web and mobile applications
- Performed testing and optimizations
- Worked with the team to design intuitive interfaces for efficient textual data processing and entity recognition

Zepstra LTD

Buea

Software Engineer

06/2023 - 12/2023

- Developed and optimized web and mobile applications tailored to client needs in diverse industries, enhancing user experience and engagement
- Collaborated with marketing and UX teams to design intuitive, user-centric software solutions that increased customer satisfaction
- Engineered scalable backend services for secure transactions, efficient data management, and automated workflows
- Performed comprehensive testing, debugging, and performance tuning to ensure robust and high-performing applications
- Implemented RESTful APIs and integrated third-party services to enhance application functionality and user experience
